

Description and application

Nozzle round diffuser NWO-5 is used for ventilation and air conditioning industrial and public buildings with a height of 2.5 m - 4.5 m, such as offices, hotels, cinemas, conference rooms, supermarkets. They are characterized by easy assembly in suspended ceilings, plenum boxes or directly on circular ducts. Assembly is done using visible screws on the edge of the faceplate or using a central mounting. By appropriate location of the nozzle in the faceplate we get different directions supplied air or the rotational motion

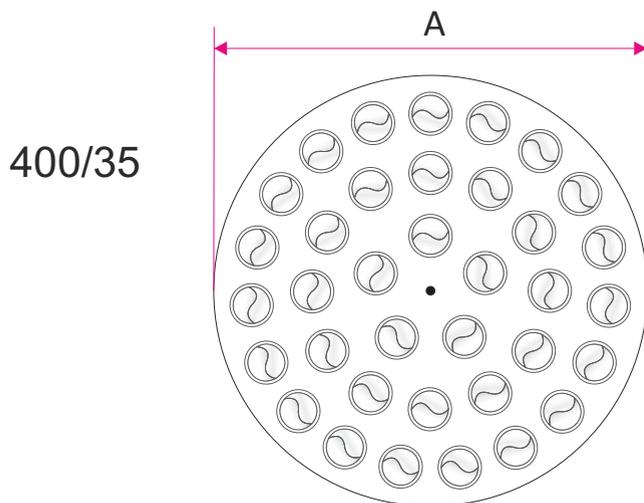

Nozzle diffuser has Hygienic Certificate HK/K/0522/01/2016

Material and workmanship

Diffusers are made up of faceplate galvanized sheet steel powder coated white RAL 9016 and specially profiled nozzles made of plastic in white. Upon customer request we can paint faceplate in any color from RAL palette and made of special stainless steel or aluminum.
